

WHO WE SUPPORT

The Bayshore Foundation for Empowered Living supports registered charities that address the gaps and barriers that prevent those—who are aging or living with an injury or illness—from reclaiming and/or maintaining their independence.

We partner with local charities that offer individuals resources and guidance; provide access to supportive tools, products, and devices; and address issues of “built” environments (society is built for able-bodied individuals; reactive healthcare; individuals unprepared for illness; discrimination against elderly; and few investments made into developing resources).

One objective of the Foundation is to keep the donations raised in a local community within that community. To meet that objective, we have chosen to partner with charities that can advise us of where the money is going and what it is being used for. We want to ensure the funds we raise have a positive impact in the communities Bayshore HealthCare serves.

One objective of the Foundation is to keep the donations raised in a local community within that community.
